- Changes with new label requirement
- Product may only be mixed, loaded, or applied by certified applicator who has successfully completed the paraquat-specific training before use.
- Application “under the direct supervision” of a certified applicator is no longer allowed.
- Active pesticide certification
- Training must be repeated every three years.
- Training is only available online:
  - [www.usparaquattraining.com](http://www.usparaquattraining.com)
- Applicators should maintain their own certification records

### How To Safely Use and Handle Paraquat-Containing Products

Teacher: Peg Shuffstall  
 Instructor: Mike Cameron  
 Instructor: Courtney Weatherbee

The audience for this course are users of Paraquat who want to learn to apply Paraquat properly and safely. This paraquat training requirement is mandated by the U.S. Environmental Protection Agency (EPA) for all certified applicators who intend to apply paraquat. *"In accordance with EPA's 2016 Paraquat Dichloride Human Health Mitigation Decision, applicators are required to take an EPA-approved paraquat training program every 3 years in order to mix, load, apply, or handle paraquat."*

You should expect to spend about 45 minutes on the course and the quiz.

If you already have an account and are logged in, simply click on the title of the course to begin the training. Otherwise, click on the **Continue** button below. This will direct you to log in or **create a new account**.

Once you have filled in the required information (select NA in the last drop-down box if you are not an Extension, University, or Government employee), click on **Create my new account**. You will then get an e-mail sent almost immediately that will say: *A new account has been requested at 'eXtension Online Campus' using your email address*. To confirm your new account, click on the link and it will take you back to the eXtension Online Campus site, where you can click on **Continue**. This will take you to the training page with a button that says **Enroll me**. Click on this and you can start the training.

## Welcome to the How To Safely Use and Handle Paraquat-Containing Products

Successful completion of this course satisfies the paraquat training requirement mandated by the U.S. Environmental Protection Agency (EPA) for all certified applicators who intend to apply paraquat. *"In accordance with EPA's 2016 Paraquat Dichloride Human Health Mitigation Decision, applicators are required to take an EPA-approved paraquat training program every 3 years in order to mix, load, apply, or handle paraquat."*

- You should expect to spend about 45 minutes going through this training. It may take longer if you go back and review parts of the training. If you need to leave the training before you are finished, when you return, you should resume from the place you left
- The course is formatted as a video that plays automatically when you click on it. You can leave the training and get back in and it will pick up where you left off.
- When you finish watching the video, next click on the Take Assessment link to take the quiz, which is 15 questions. You must get 100% to pass, but you can retake it right away if you miss any questions. Once you pass with 100% you can print your certificate.

Once you have finished reviewing the material, you will need to take the Final Assessment. You must correctly answer all questions in order to pass the test and receive your certificate. You can take the test as many times as you need to in order to pass. Be sure to print and retain your certificate when you are finished.

If you have questions regarding the requirements, please refer to the EPA's [frequently asked questions](#).

### Announcements

## Introduction and Learning Objectives

After completion of this course, you should better understand:

- What has changed with paraquat products
- First Aid if a paraquat product is swallowed
- Different routes of exposure
- Emergency decontamination procedures
- Proper Personal Protective Equipment (PPE) Removal

## Watch The Course

Begin the course by clicking on the "How To Safely Use and Handle Paraquat-Containing Products" link below. Within the module you will watch a 30 minute video. After watching the video and completing the module you will need to take the final assessment.

### Watch The Course

Begin the course by clicking on the video below. You can start and stop as needed. If you need to leave the training before you have finished, when you return, you will begin where you left.

To play "full screen," click the box icon in the lower right-hand corner of the video (between the time remaining and volume icon.)

Paraquat products are highly toxic when ingested and should never be placed into beverage or food containers. It is illegal to do so.

▪ **Paraquat Dangers:**

- Accidental ingestion of paraquat has led to death.
- **ONE SIP CAN KILL!** One small sip can be fatal.
